introducing  
**PERIOE**  
**MICROBIOME**  
to help support  
healthy oral care

Microbiome are beneficial micro-flora, with prebiotics, which create a protective layer that help keep teeth and gums looking healthy all over. Brushing can help wipe out “bad bacteria” that hides in gum tissue, but toothpaste with prebiotics can help tip the balance in favor of “good bacteria” to support optimum oral health.

### DID YOU KNOW

Your mouth is home to the second-largest amount of microbiome in the body, second only to the gut. Being the gate, oral microbiome is related to overall health.
